

IEI Case Study Network Firewall

A robust, long-term solution

with PUZZLE-IN001

IoT Solutions
Alliance

Overview

The traditional route of a dedicated firewall hardware appliance is too bulky and costly, so our customers were looking to upgrade their current systems with a robust, long-term solution.

The problems that our customers faced

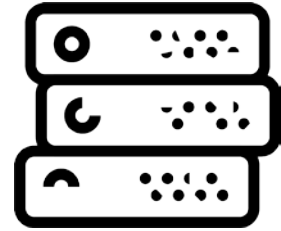

The network firewall used by our customer was...

Difficult to upgrade

Hard to fully utilize
resources

With closed
software structure

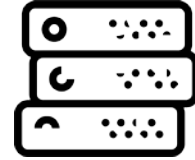

After they choose IEI PUZZLE-IN001, those problems they faced are

Difficult upgrades

Underutilized
resources

Closed software
stack

The problems they faced are no longer a problem

Difficult upgrades

Underutilized resources

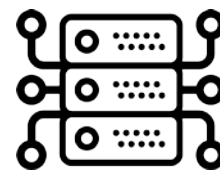

Closed software stack

Easy to upgrade

Higher efficiency

Open-source software
