

# All-in-one Network Video Surveillance Solution

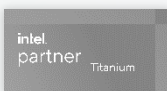

# Overview

Common video surveillance systems generally provide inadequate video quality in low speed, and have limited expansion capabilities, impeding future expansion and upgrades.

Moreover, the cross-platform integration is the biggest issue for system integrators and owners. Traditional solutions lack remote access, leading to cumbersome equipment maintenance and onsite visits, and increasing the TCO when factoring in post-installation maintenance.

# Problem

Heavy effort for equipment maintenance and onsite visit

Hard to provide non-stop services

Low open source SW compliance

Difficult to upgrade

# Selection for Video Surveillance

## PUZZLE-IN001

intel  
partner  
Titanium

- Slim form factor with 1U rackmount chassis
- Support 8 GbE RJ-45 via Intel® I211
- 2 x 288-pin DDR4 DIMM
- 2 x PuIM Network Module Card
- One PCIe x8 slot and one PCIe x4 slot
- Designed with redundant power supply
- Linux-tested ready

# What IEI Can Offer

**Easily Upgraded with  
PulM Module**

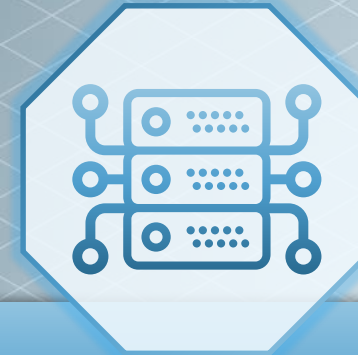

**High Mobility**

**Uninterrupted  
24-7 Service**

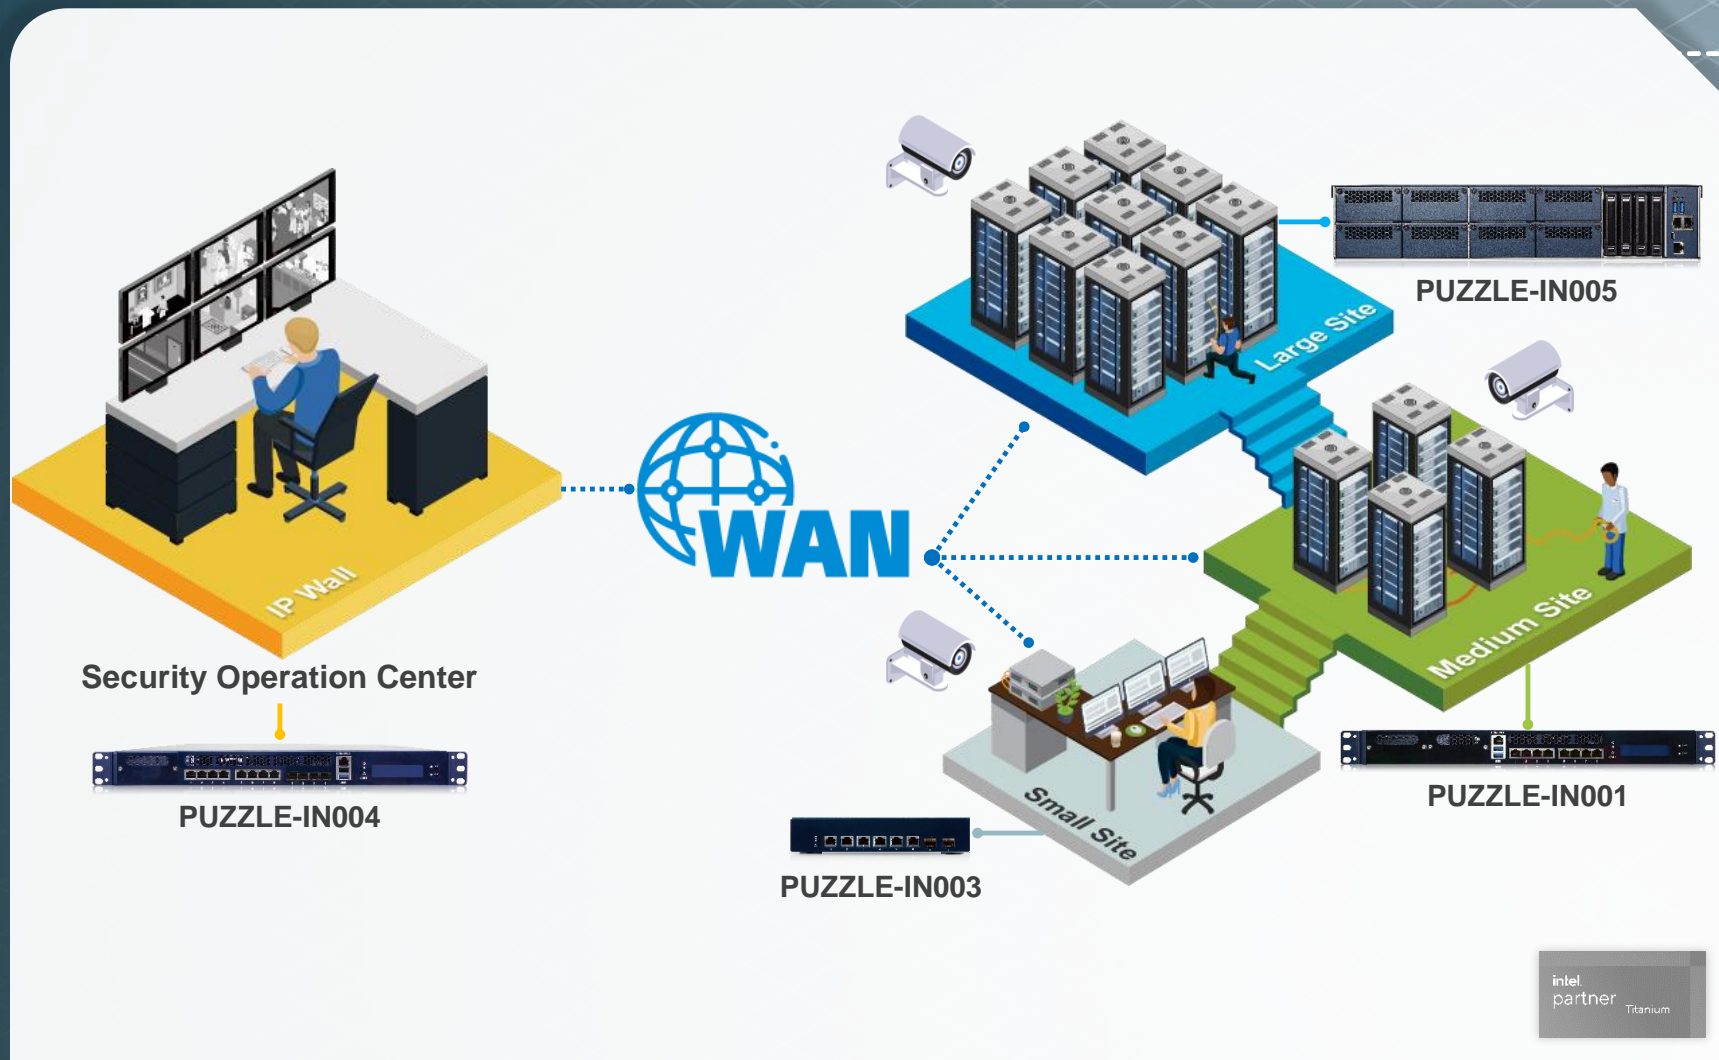

**All-in-One Function  
for Multiple Tasks**

**Centralized  
Management**
